SoftCom Message Archiving

For many companies message archiving has become a corporate necessity. Whether communicating with suppliers, clients or employees, virtually all agreements, understandings and documents are transmitted via email. But email archiving is more than the preservation of your corporate electronic records. It's a matter of Reputation, Integrity and Control.

Select which employees will receive archiving, and all their messages will be automatically saved in a secure and immutable archive with unlimited mailbox storage.

Employees will have access to ultra fast archive search and one-click retrieval of their archive messages to their Outlook mailbox.

Administrators have audit capabilities to review and monitor email messages in real time.

Challenges

- All messages saved
- Ultra fast search and one-click retrieval to Outlook mailbox
- Long term tamperproof storage of all messages
- Unlimited mailbox storage
- Domain wide searching

Compliance

- Compliance archiving with monitoring capabilities
- Internal (governance, policies, ethics & HR issues)
- Industry specific compliance solutions
- Access to legal expertise

Litigation and Electronic Discovery

- Proactive protection for your business
- Affordable discovery and case management
- Evidentiary quality messages for court
- Rapid electronic search and retrieval
- Archiving is your insurance policy
